

# CYBERSECURITY IN INTERNATIONAL ARBITRATION - ROME

This event is organized by **CPR**, **CPR's European Advisory Board (EAB)** and the **ICCA-CPR-NYCBA Working Group on Cybersecurity in International Arbitration**. It is hosted by **Shearman & Sterling** and supported by the **International Council for Commercial Arbitration (ICCA)**, the **Milan Chamber of Arbitration (CAM)** and **NetLeg - Network Legale**. We thank **Confedilizia**, **Italian National Confederation of real estate property** for its generosity.

## DATE:

October 10, 2018

## TIME:

4:30 – 5:00 pm: Registration

5:00 – 6:30 pm: Program

6:30 – 7:30 pm: Networking reception –  
Generously sponsored by Shearman & Sterling

## PLACE:

Confedilizia – Via Borgognona, 47 – 2nd Floor – 00187 Rome, Italy

At this townhall-style event, a panel of distinguished speakers will discuss key aspects of cybersecurity in international arbitration and present the draft cybersecurity protocol for international arbitration recently released by the Working Group formed by the International Council for Commercial Arbitration (ICCA), together with the International Institute for Conflict Prevention and Resolution (CPR) and the New York City Bar Association (NYCBA). The [Draft Protocol](#) is meant to raise awareness about cybersecurity risks and to propose a framework that parties and arbitrators can look to in order to determine reasonable cybersecurity measures for their arbitrations. During a public consultation period that extends through the end of 2018, the Working Group is seeking feedback from the arbitration community about the draft protocol, and this event will be an opportunity to discuss several aspects of the protocol. Participants will have an opportunity to answer several questions relating to cybersecurity via live interactive polling. The event will be followed by a networking reception generously hosted by LALIVE.
